

To configure Windows Media Player to view these files, please follow the steps below:

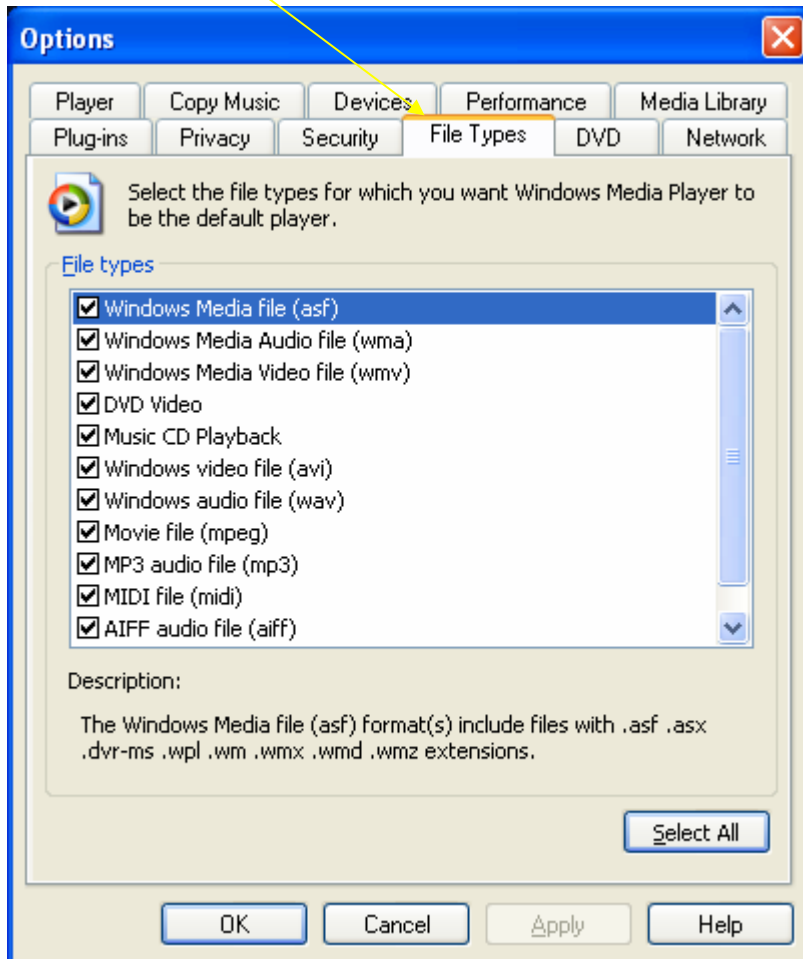

1. Open Windows Media Player
(Click Start->All Programs->Accessories->Entertainment->Windows Media Player)
2. Select “Tools”

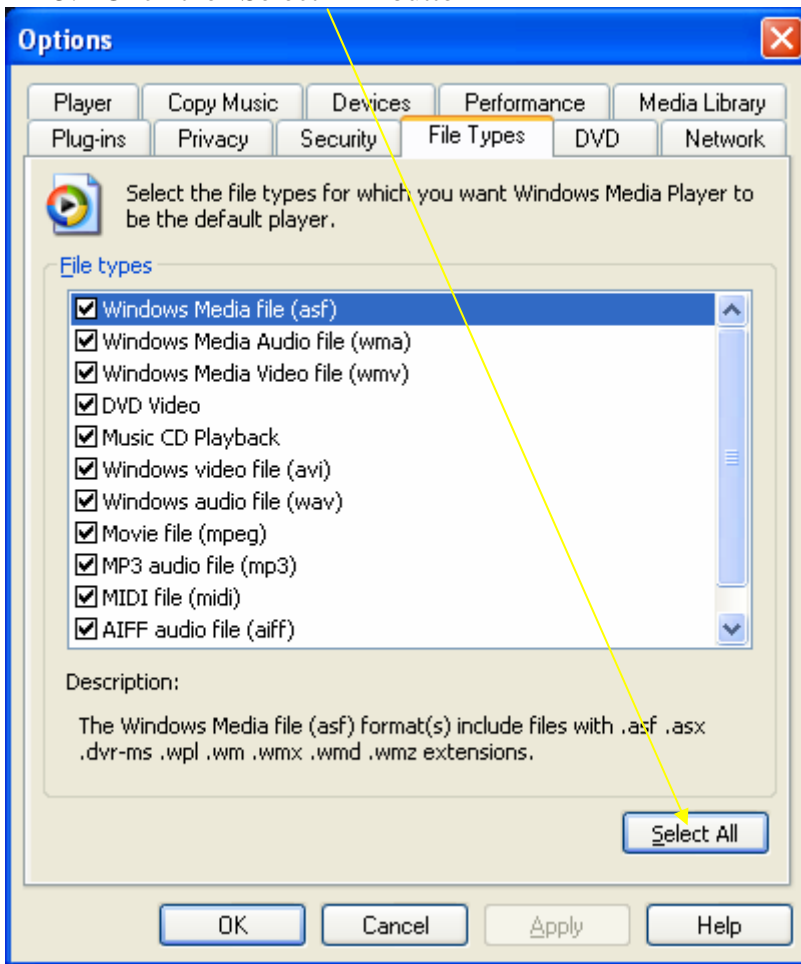

3. Select “Options”

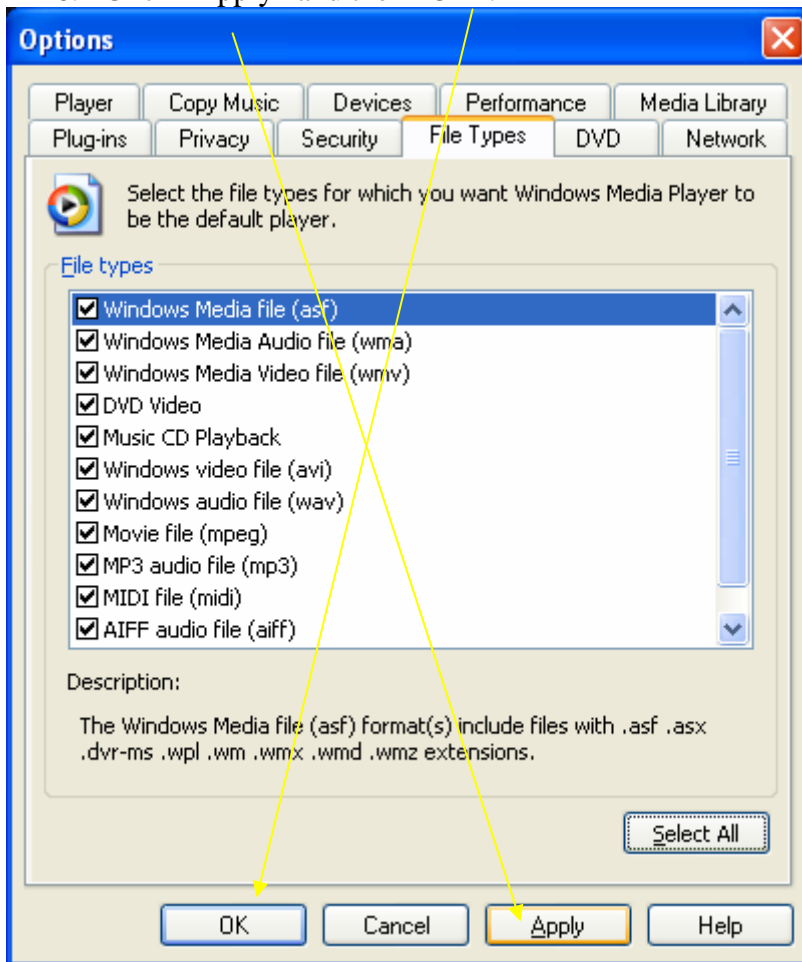

4. Select the “File Types” tab

5. Click the “Select All” button

6. Click “Apply” and then “OK”.

7. Close Windows Media Player and try to view the links on the internet again.

8. Please remember, to enjoy the movies further, click the view in “Full Screen” when the movie has started.
